DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-5 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The cited claims are directed to a deadlock pre-detection program comprising a plurality of procedures (routines) and are thus software per se. The cited claims do not fit one of the statutory category of inventions since the claims are not methods, a machine, an article of manufacture absent of the storage medium for the programs functions to be realized, and a composition of matter. The intended usage of the program for making a computer execute, is not enough to make the claims statutory since program code is always intended to be executed and the claims appear to be directed toward the program itself and not the execution of the program.
